

Report

The platform that guides you from the compilation of your ESG indicators, according to ESRS and GRI standards, to the generation of the sustainability report.

WHY Reporting

The Sustainability Report provides a clear view of the company's practices in accordance with the regulations that underpin **sustainable development**. It is an effective tool to improve corporate **reputation**, internal sustainability, **optimize** resources and **reduce operating costs**.

YEP - Your ESG Platform

- ESC Standard: all indicators are pre-loaded on the platform, with the possibility of using only those of competence
- Organisational structure: structural organisation from the individual site to the group
- Dashboard: interactive dashboard on tasks to be performed, compilation progress, evidence of KPIs due and to be completed
- Sustainability report: automatic generation of your report with tables, graphs and data reported in the application and export to your letterhead

Intuitive and tailor-made

A solution tailored to the needs of your organization, thanks to the differentiation into **roles** and related visualization of relevant KPIs, as well as the customization of the **structure**, from the simplest to the most complex. Even the KPIs themselves can be visualized according to the **required standard** (GRI, ESRS), to specific requirements outside the standards and to your own **materiality analysis**.
